ABOUT ME

I am a final-year Computer Science student with a strong interest in game development. I am actively working on personal projects to strengthen my gameplay programming skills, including C++, Unreal Engine, and 3D modeling.
I am motivated to grow as a developer by gaining real-world experience and collaborating with teams.
As a gamer, I am particularly inspired by open-world games with immersive gameplay, featuring exploration, puzzles, and RPG elements. This drives my ambition to contribute to high-quality game development.
